

ITAL 295: Final Project Reflection Paper

Prompt: This reflection paper is comprised of two parts.

For **part 1** please: (a) summarize what you learned during the process of creating your project (new content and/or responses to research questions, challenges you overcame while putting your project together, things you would have done differently) and (b) evaluate the effectiveness of producing a creative project in lieu of a traditional research paper, on your learning (i.e. Did creating this project help you develop new skills? Did embracing creativity impede your ability to be organized/ make it more challenging for you to convey what you learned?)

For **part 2**: (a) share your observations of projects curated by two peers (this can be on the information presented, the modality of the project, the impact of the project outside of academia) and (b) share advice for a student who is asked to create a final project for a future iteration of this course.

Please write between **250-300 words**. This reaction paper is due by **Wednesday, May 6th at 12pm**.
